## EDUCATION

- Sahyadri College of Engineering and Management, Mangalore** 2021-2025 (Expected)  
B.E, Information Science and Engineering CGPA: 8.73
- S.V.S PU College** 2019-2021  
Board of Pre University Education, State Percentage: 91.2

## TECHNICAL SKILLS AND INTERESTS

- |              |            |           |               |
|--------------|------------|-----------|---------------|
| • Java       | • React.js | • MongoDB | • TailwindCSS |
| • JavaScript | • Next.js  | • MySQL   | • PostgreSQL  |
| • Docker     | • Node.js  | • Redux   | • TypeScript  |

## EXPERIENCE

- Twifonic** March 2025-April 2025  
Part-time Full Stack Developer Remote
  - Tech stack: Next.js, Node.js, TypeScript, Tailwind CSS.
  - Developed a video calling application with real-time communication features, supporting 20+ concurrent users with 99% uptime.
  - Engineered responsive UI design for seamless experience across desktop and mobile devices, improving user retention by 35%.
  - Integrated WebRTC technology for low-latency video streaming, reducing connection establishment time by 40%.
- Niveus** October 2023-November 2023  
Intern Full Stack Developer Mangalore
  - Tech stack: NextJs 13, Tailwind CSS, Node.js 18, Express.js, TypeScript.
  - Engineered a citizen engagement platform processing 30+ public issues monthly, enabling users to submit, update, and delete issues with 90% user satisfaction.
  - Enabled users to upload pictures of issues, reducing issue resolution time by 40%.
  - Integrated automated categorization, improving the accuracy of issue assignment by 35%.
  - Collaborated with UX team to implement accessibility features, increasing platform usability for differently-abled users by 45%.

## PERSONAL PROJECTS

- GST Billing Software | GitHub | {Next.js, Node.js, PostgreSQL, TypeScript, TailwindCSS}** April 2025-May 2025  
Financial Management Solution (Freelancer)
  - Developed a comprehensive GST billing software with Next.js and Node.js, processing 200+ invoices monthly with 100% tax compliance and reducing manual calculation errors by 95%.
  - Architected a secure PostgreSQL database system for storing financial records, ensuring data integrity and enabling real-time reporting with 99.9% accuracy.
  - Created an intuitive dashboard with responsive design, decreasing invoice generation time by 70% and improving overall business efficiency by 40%.
- 3D Virtual Try-On | GitHub | {Flask, MongoDB, Threejs, Next.js, TailwindCSS}** February 2024-December 2024  
E-commerce Website
  - Designed and implemented an interactive e-commerce website with a 3D virtual try-on feature, boosting user engagement by 25% and reducing product return rates by 15%.
  - Built a scalable backend API using Flask and MongoDB, managing 50+ product entries with 99% data integrity and improving response times by 40% through efficient caching mechanisms.
  - Optimized real-time 3D rendering using Threejs, reducing model loading time by 30% and enhancing memory efficiency by 25%.

## ACHIEVEMENTS

- IEEE:** Delivered key insights on improving predictive analytics during presentation at IEEE COSMIC event; utilized data-driven analysis and peer feedback to identify top three causes of inaccuracies in existing algorithms while advancing professional network connections.
